

### 3. Faraday Printed Circuits Ltd. – A Policy Statement

The Senior Management of Faraday Printed Circuits Ltd are committed to manage and continually improve our products, processes and activities in a responsible and effective way to:

Meet the requirements of our customers by:

- Ensuring the quality of product is right first time.
- Monitoring and maintaining delivery performance to meet our customers' requirements.
- Developing staff to greater levels of competence enabling them to contribute to the improvement of processes and products.

Prevent pollution and reduce our impact on the environment by:

- Managing our resources in such a manner to minimise unnecessary or avoidable consumption or waste.
- Proper management of waste (to water, land or air) arising from our activities.

Prevent injury and ill health by:

- Ensuring all employees are aware of their duty with respect to their own safety and that of their co-workers.
- Risk assess activities that present a hazard in our workplace or that represents a risk to employees.
- Ensuring all employees are aware of their duty to point out any potential deficiencies in procedures or working practices (ultimately responsibility for ensuring that good health and safety procedures are implemented and maintained rests with the Managing Director).

To achieve this commitment, Faraday Printed Circuits Limited operates an integrated management system (IMS) which is continually improved in line with business objectives and satisfies the requirements of BS EN ISO 9001:2015, BS EN ISO 14001:2015 and the ethos of ISO 45001:2018.

The management system complies with applicable legal requirements as a minimum. It also meets other compliance obligations that relate to inherent OH&S hazards or environmental aspects. We regularly set documented objectives and targets and monitor our progress in achieving them.
